

LIVE FROM ITALY!

THURSDAY 5:00PM OCT 7 2021 | SHORT FILMS

Our 2021 Festival opens with the world premiere of ***Precollinear Park: A Placemaking Experience***, a short film about the revitalization of Precollinear Park in Turin, Italy. The premier will be followed by a live presentation from our partners at *Urban Stratosferica* (an urbanism festival taking place concurrently in Italy from October 7-10th) and local expert discussants.

Following the live presentation, we will conclude with a short series of films about the intersection of street art and placemaking. We head to Rome where a rogue street artist carves dead tree stumps into beautiful sculptures. Then we continue to exercise our creative re-imagining of space with shapes and movement. *Forms* explores the shapes of spaces, while *Moving Barcelona* uses dance to reorient our sense of space and place. *Disco* introduces us to a street performer who connects his community. Lastly, we'll see how street art in Juárez, Mexico, is pleading for justice.

FILMS IN THIS SCREENING
